

# Supply Chain Portal

A free online toolkit to help you prioritise the suppliers that would have most impact on your business in the event of an interruption, and to manage the risks appropriately.

## Helps to manage the impact your suppliers can have on your business continuity

### Why protect against supply chain failure?

Supply chains are becoming increasingly complex, and even a small disruption can have major consequences. The number of examples of UK businesses failing to recover from supply chain disruptions is growing.

Businesses can have very little control over the causes of disruptive events, which could be anything from IT or machinery failure to customs delays or environmental catastrophes.

### About the Supply Chain Portal

The Supply Chain portal has been developed by business continuity experts including leading UK commercial insurers. It has been launched by RISC Authority, the insurer-funded industry research scheme administered by the Fire Protection Association (FPA). It poses a series of simple questions with dropdown answers, which are then scored to establish a red, amber or green scoring matrix of supplier vulnerability.

### The key benefits of the Supply Chain Portal

- Helps you identify which suppliers are key to your business
- Gain a clearer understanding of supply chain exposure
- Create a more robust and resilient supply chain plan to manage the consequences of disruptive issues and events better
- Plan to survive supply chain events that can cause other businesses to fail
- Free guides and resources to help businesses understand the issues better
- Increase resilience to any potential supply chain failure
- The Supply Chain Portal is GDPR compliant, data is kept secure and confidential
